WAYS AND MEANS BILLS

general complaint against the Legis-Council of Vancouver Island is that it no work-that it is a listless, lethargic dy, lying like a dead-weight on the Asably. After Monday's proceedings, however, the public will have to award it a different characteristic. On that memorable day it threw out the whole of the Assembly's Ways and Means bills-with an industry and a pertinacity that were quite refreshing it continued its work until not a vestige of the Assembly's labors was discovered but a LEWIN & ANTHONY. small measure for reducing the license of country public houses. The bills sent up by the House aimed at a reduction in the taxation of the colony of about \$50,000; the retail dealer and the owner of real estate would have had their burdens lightened; the farmer would have had his mileh cows imported at a cost of one dollar instead of four, and the mechanic and the employe generally would have been rid of the obnoxious salary tax. The Council, with an eye after the people's dollars and cents could not see it, however, in that light—they wanted to keep the public nose to the grindstone, ar they did what our contemporary the Chronicle, in its independent and patriotic spirit, calls a "good work." Had these enomies to the public welfare of Van-couver Island—the Colonial Secretary and his colleagues-passed a measure attempting to legitimise arson or murder, we have no the slightest doubt our intelligent contemporary, in its anxiety to support public right would have called it a "good work." Every attempt that has been made by the Execu tive or its myrmidons to heap or retain burdens on the public — every effort that has been made to destroy the liberal and economising measures of the Lower House - has been endorsed by the sapient genius of the Chronicle, and called " a good work." It is not our intention, however, to waste time on the contempt ible inanities of our contemporary. We have to deal with the mighty financiers o the Upper House-with the men who de clare that the most stable security for a loan is the most unstable thing in the colony-real estate. The credit of the country wil be endangered, say they, if the tax is repealed and on recurring to the estimated receipts for 1865 and 1866 they find the stable security of \$110,000 in the former year had dwindled down in the short space of a twelvemonth to \$50,000. This year it will go much lower, and next year, if

some, we might almost say violent, change

in the Government of the country shall not have taken place, it will sink into absolute

nothingness; for, as we have previously re-

marked, land will have lost every value but

there will be no domand for it. The action

of the House the present session-in its re-

duction of the official and public expenses-

its passage of measures to secure families in

the fruits of their industry, and protect

husbands from imprisonment for debt-was

to retain the population we have in the country

and to encourage people to come to our shores.

The Upper House, however, do not want

the country settled up-they do not want the

California steamer drain the colony dry; and

they are succeeding admirably. In a little time their august labors will be needless; for they shall have only the Siwash population of the Island to deal with. We know Mr. Young has been a long time calculating over the step he has taken. He did not dare to throw these bills out when there was a known majority of men in the Assembly against Government extravagance but he fancies that the House now is an ab ject House ready to swallow any measure he or the Executive may propose. We think, however, that in this as in other things he is mistaken. A little while ago we were told by the Colonial Secretary that the Ways and Means bills would not be taken up until the Supply bill had been sent to the Council by the Lower House, and we were sagely informed by our contemporary that Mr. Young, by this "ingenious" device, had checkmated the Assembly. The Assembly, however, took no more notice of Mr. Young's "ingenuity" than they did of a South American pronunciamento, and the ingenious Colonial Secre-tacy was obliged to swallow his words and his discomfure by taking up the Ways and Means without the Bill of Supply. He has now with his colleagues thrown these bills out; but he has done more. He has armed the Lower House, as we will show to-morrow, when we go into both his and the Treasurer's figures with the best possible weapon and the most irrefutable argument to make another sweeps ing reduction in the supplies before they shall have been sent to the Upper House.

To THE EDITOR OF THE COLONIST. TO THE EDITOR OF THE COLONIST.

SIR,—We notice in the report of one of the papers that Dr. Dickson stated in the Ascembly, in the discussion of the Water bill, that the creason his water was sometimes bad was that the drainage from the Hotel de France permeated the wooden pipes of the Water Company. Now, sir, for the information of Dr. Dickson and the public generally, we will state that the drain at the Hotel de France is seven feet and a half deep, while the water pipes are only sunk three feet, or four feet nearer the surface than the drain confoundation. If there be any impurity in the water it must therefore arise from causes very different from that stated by the medical gentleman.

GREAT SAVING IN DRESSMAKING

MOGOIS.

BY THEM A LADY CAN, IN A FEW minutes, shape any stricle of wearing apparel, including the GORED DRESS, BAS-GUINE, SACK, POSTILLION, ZOUAVE, GIRDLE, APRON, PANTALOONS, VEST, &c., to fit perfectly without trying on.

The System is Mathematically perfect, hence it removes all anxiety regarding the fit of a Dress. There will be no ALTERING—no TAKING UP or LETTING OUT, which not only injures the material but destroys the proportions and often ruins the Dress. It is not only exact, but so clear and simple that any person can learn in an hour to cut any garment.

How many ladies of limited means could dress better could they SAVE THE PRICE OF THE MAKING OF A DRESS, which they can do by the use of these MODELS; and how much use-less anxiety would be saved by the wealthy and most fastidious were they certain that the dress being made would fit to please them. It would fout by this system.

Is it not pleasant for mothers to be ablo to cut, without the least trouble to themselves, all the little Jackets. Pantalons, Dresses, Apron., etc., while the children are happy at school or at play. Ladies, just try to realise yourselves being ablo to cut, after a few hours' attention to this System, every style of GORED DRESS to fit perfectly wearing apparel to a pattern or of trying on, and every style of GORED DRESS to fit perfectly wearing apparel to the statement of the largest person, and the cutting to be a delight instead of a trouble. Realise this, and the see if you can get along without these Models.

Type Models supplied gratis to those taking instruction, and Fashionable Patterns sold separately if desired. Ladies waited on. Me Im

THE TRAGEDY IN THE OVERLAND STAGE COACH .- The frightful tragedy in the overand coach from Denver last March. during which our fellow townsman, W. W. Barlow, Esq., U.S. Marshal, took an active part towards quelling the trouble, is fully described in the Fort Kearney Rerald. A short account was transmitted to us by telegraph at the time the occurence happened, and showed that the outlaw who began the work was a refugee from justice in Montana, named Hanschild. He undertook to murder all his Hauschild. He undertook to murder all his fellow passengers in the coach, six in number, fearing he would be arrested by Mr. Barlow, himself a passenger. So soon as they reached a suitable station, and while all were asleep, on the morning of the tragedy he stabbed one passenger, and shot another, a Mr. Rice, who immediately expired. The person who had been stabbed, then seized the pistol of the desperado, but could not prevent his shooting at random. An eighth passenger, on the top of the coach, awoke at this stage of the proceeding, and the dripassenger, on the top of the coach, and the dri-ver knowing where the pistol reports pro-ceeded from stoned the team, when the work ceeded from, stoped the team, when the work of the ruflian was soon supressed. Mr. Barlow was stabbed in the check, the wound proving nearly fa'al. The cavalry escort coming up, Hansehild was left with one of them, and lingered until 9 o'clock in the morning, when he died and the body was buried by the tead-side. The body of Mr. Rice was taken on to the Cottonwood Springs Station and buried there. He was wealthy ranchman, living on one of the tributaries of the Platte river, and was en route East for a flock of sheep. During the day utaries of the Platte river, and was en route East for a flock of sheep. During the day previous to the tragedy, Hanschild evinced an uncalled-for degree of alarm whenever any narative of lynching was recited, and once, when a rope dangled over the window from the top of the coach, one of the passeggers jocularly suggested that "it must be to hang some fellow with," when Hanschild jumped up and begged to be taken into custody, and not hang. The gentlemen told him he knew nothing of him, nor did he wish to know. The conversation turning wish to know. The conversation turning upon Indians, the subject of arms was dis-cussed, when Hanschild ascertained that

but two of the passangers were armed besi-des himself. He had mentioned, too, that he had no money left after paying his fare. GOT AN ELEPHANT.—One of the leading business houses of San Francisco has upon its hands an elephant, in the shape of thirty cases of nitro-glycerine. The Bulletin thus refers to the action of the owner: "He first stored it at the Pottero, near the nowderhouse, where he supposed it would be out of harm's way, and where no danger could arise from its presence. But Chief Burke notified him of his intention to pitch it into the bay, when he was compelled to obtain a temporary injunction to save his blasting oil. He then hired a small sloop of some Chinamen, into which he loaded the dangerous oil, and which he loaded the dangerous oil, and anchored the vessel and cargo some distance from the shore, and yet in shallow water so that vessels could not collide with it nor people easily reach it from shore. But the Chinamen owning the barge are to day argent for its possession. The owners have rigent for its possession. The owners have now pretty definitely determined to store it on Goat Island, on a portion which is unfrequented and uninhabited, to which proposition the owners and occupants of the Island have assented. So that it is now probable that it will be stowed in such a position that no damage can result from its explosion, even if it should suddenly blow up. Still be cannot ship it, for probably no vessel will take it on board after the recent terrible accidents, and it is dillucult to see what can be done with the explosive stuffs. At all be done with the explosive stuffs. At all events, it is out of the city, and away from human habitations, and that is a great comfort" -- Oregonian

ARRIVAL OF MERCER'S FEMALE EMIGRANTS. The Bulletin of the 24th thus chronicles the rrival of the steamer Continental at that them women, who came out here on the re-Mercer, of Washington Territory :- "Immediately upon the steamer being telegraphed large number of people rushed down to the wharves, whether to select wives or to gratify their curiosity as to the personal appearance of the fair emigrants, or for what object is unknown to any but themselves. But they were doormed to disappointment, for the ship was attached to the budy off Folsom street wharf, several hundred feet from the shore, and no one was allowed on board. There was a great fluttering of calico on board the ship as she passed the city front, the observed of all observers, and probably a responsive fluttering of some masculine hearts on shore, whose owners have become tired of the for-orn state of bachelorhood. It is said to be lorn state of bachelorhocd. It is said to be the intention of the consignees to transfer the passengers to some other steamer bound northward, and convey them to Olympia, in Washington Territory, their original place of destination. The passenger list shows a large number of 'Misses,' most of whom are probably not averse to changing their title and their name." The Call says quite a number of persons obtained boats and endeavored to go on board the steamer, but found that such a course was not allowed by the officers. Who politicly but firmly notified found that such a course was not allowed by the officers, who politely but firmly notified them to "keep ofl." The arrival of the Sierra Nevada yesterday morning provoked no little gossip in our city, regarding the earge of the Continental, but that portion of our population who were on the qui vive to see the girls were doomed to disappointment, as not more than two or three, it any, arrived here, and these incag. It is thought that here, and these incog. It is thought that far the greatest part of the fair cargo will not proceed further north than San Francisco, as they would be induced by favorable offers to remain in California. Thus ends the closing chapter of the great King's County Emigration Scheme.—Oregonian.

The removal of the troops stationed at Camp Cady, has had a very bad effect, as the Indians are emboldened to commit depredations without fear of punishment, and unless a detachment of cavalry is immediately sent to that or some other point on the Majove river, serious interruption to the travel on that road may be expected.—S. The particulars of the evidence in this The pattentials of the evidence in this case have a liready been elicited and published during the preliminary enquiry. Mr. Thomas and his barman were examined, as also Joe Thomas, a Russian, Inspector Welsh and others: It appeared from the testimony of Joe, that the prisoner had told him that he was engaged in making keys, and

timony of Joe, that the prisoner had told him that he was engaged in making keys, and that he had a key that would open Mr. Thomas' safe, and that he would soon have money. Other circumstances tending to fix the guilt upon the prisoner were proved.

Mr. Ring addressed the Jury dwelling mainly upon the absence of direct testimony of guilt, as against the prisoner, and the probability that the witness Joe, was the perpetrator of the deed.

His Lordship put the case lucidly before the jury, who retired about ten minutes, and brought in a verdict of not guilty.

The prisoner was thereupon discharged.

The Bergund Huttenmannische Zietung states that among other disadvantages of Noble's nitro-glycerine is the fact that it freezes at a temperature very probably above 42 deg. Fah. It is said that at a temperatur 42 deg. Fah. It is said that at a temperature of 43 deg.—46 deg. Fah. the oil solidifies to an icy mass, which friction causes to explode. It is probable however, that the freezing point of the oil lies somewhat lower than is here stated, though as yet no exact determination of the lreezing point of the oil has been made. A newspaper from Hirchbirob, in Silesia, gives a sad account of an accident caused by the frozen oil exploding by Iriction. Nitro-glycerine there being used in making a railway tunnel. It was kept in glass vessels, packed in straw, and kept in glass vessels, packed in straw, and placed in baskets, each vessel containing one-fourth to one eighth of a hundred weight of the oil. For several days the oil had been frozen. It was carefully handled, and pieces were separated by means of a piece of wood and put into the bore-holes, and it was found that the feozen nitro-glycerine exploded quite as well as the fluid. One day an overseer at the shaft hit upon the unlucky idea of breaking into pieces with a piek a kept in glass vessels, packed in straw, and idea of breaking into pieces with a pick is seven or eight pound lump of the frozer nitro-glycerine. The blow caused the mass to explode, and the unfortunate man wa to explode, and the unfortunate man was blown up into the air and fell back into the shaft some forty or fifty feet deep, while two workman, who were making catridges a short distance from him luckily escaped with a slight injury.

A NEW VIEW OF THE SUBJECT.

Some years ago it was proposed by an Some years ago it was proposed by an American physician that members of the Faculty should advertise their remedies and modes of treating diseases in the newspapers. It was a bold and manly Idea. It was scouted, however, by the profession generally, as infra dig. But is there any degration in publicity? Is it not rather the great touchstone that view pretensions and universalises. tone that vies pretensions and universalises the practical benefits of all valuable inven-ons and discoveries! Should not a pro-ssion that aims at the mitigation of sufferng and the preservation of life make the means of attaining these grand objects known through the channel of information most through the channel of information most accessible to all classes and conditions—the columns of the public press! If it declines to do so, the natural inference is, either that the desire of scereey arises from a sordid, monopolising, energetic spirit, or from a lack of faith in its own prescriptions.

Viewing the subject in this light, we may presume. Professor Holloway some twenty the series of the professor Holloway some twenty

years ago overleaped the barriers which the profession had crected between itself and the profession had erected between itself and the public, and plunged fearlessly into the newspaper arena. He had discovered, or rather invented, after years of research and experiments, two preparations which he believed to be specifies for nearly all the diseases of mankind; and as an indication of his confidence in them, and a proof of his philanthropic wish that, if really valuable, they should be accessible to the whole world, the advertised them wherever advertising media existed. This was the severest ordeal to existed. This was the severest ordeal to which he could have submitted them—the experimentum crucis. He threw them as experimentum cruess. He throw them at once, as it were, before the sick of all regions. He stated their properties, proclaimed what they would do, and staked reputation and fortune upon the issue. That issue has been all that he or the world could have desired. The rich and the poor the learned and the ignorant, physicians statesmen, monarchs, a nation of enlightened treedom, have sanctiened, used and extelled. freedom, have sanctioned, used, and extelled them. They are fixed facts in medical hisv! Is not this better than hiding light under

HOLLOWAY'S PILLS

Nervous Disorders. Norrous Uisorders.

Whatis more fearful than a breaking down of the nervous system! To be excitable or nervous in a small degree is meet distressing, for where can a remedy be found! Here is one:—Drink but little wine, beer, or spirits, or far better, abstain from them altogether; do not take coffee—weak tea is preferable; get alt the fresh air you can; take three or four of the Hills every night; eat plenty of colids, and avoid thouse of slops. If these gooden rules are followed, you will be happy in month, strong in body, and lorget you have any nerves.

If there is one thing more than another for whichese Fills are so tamous, it is their purify ingpreperties, especially their power of cleansing the bloofrom all impurities, and removing dangerous, an enewing supended secretions. Universally adoped as the one grand removing to female complaints these Fills never fail, never weaken the system, an always bring about what is required. Disorders of the Kidneys.

In all desease affecting these organs, whether hey secrete too much or foolittle water; or whether they be affilled with stone or gravel, or with anche and pains settled in the loins over the region of the kidneys, these Pills should be taken according to the printed directions, and the Olutiment should be well rubbed into the small of the back at bed time. This treatment will give almost immediate relicitate all other means have failed.

Stomach out of Order.

o medicine will so effectually improve the tone he stomach as these Fills; they remove all acid-coasiende dittler by intemperance or improper.

They reach the liver, and reduce it to a lity action; they are wonderfully efficacious in so of spasm—in fact they never fall in curing all refers of the liver and stomach. No disease are more frequent, lew more danger one, than affections of the respiratory organs. The first symptoms of disordered action may always be removed by Holloway's renowned Pills. GOLD MINES, British Columbia

The Safest, the Shortest and the Cheapest Route to these rich Placer Mines is by way of

Victoria, Vancouver Island.

Passengers going this way have not to ross the dangerous Columbia River Bar, and the distance is over One-Third-or 279 Miles—Shorter by way of Victoria than by way of Portland.

The Governments of Vancouver Island and British Columbia have subsidised the following powerful steamers to carry miners from San Francisco to Victoria and New Westminster direct :-

Thorn.

These, or other first-class steamers, will run on this route regularly, and will connect at Victoria with swift River steamers carrying passengers to Yale, a distance of 175 miles. From Yale to Savana Ferry, a distance of 133 miles, there is a splendid Government Wagon Road and Comfortable way side 14 75 Houses every few miles; over this road trav ellers can easily walk, or they can ride in Barnard's Fast Four-horse Stages. From den City, upper end of Shuswap Lake, a distance of 111 mlles. From Ogden City to the Columbia River, a distance of 34 miles, there san excellent Government Pack Trail.

CARIBOO rom Yale, over which it is easy to walk, or travellers can ride in fast Stages.

The Steamers running from San Francisc for the conveyance of passengers, by way of Victoria and the Fraser River, being under contract to the British Colonial Governments, the Rates of Fare charged are very low, and passengers are expeditiously, comfortably and cheaply conveyed from Victoria to the

Miners going from San Francisco to the British Columbia Gold Mines will derive nother great advantage by visiting the FREE PORT OF VICTORIA. In Victoria, Miners can supply themselves with every article they require, free of duty, and 25 to 50 per cent cheaper than they can buy similar goods in California or Oregon.

HOLLOWAY'S PILLSAND OINTMENT—Stomach and Kidneys. Between these two organs there exists a close and intimate relation which is demonstrated by the wasting which occurs in all diseases afflicting the kidneys. The disordered stomach is often the first index of renal irregularity. Holloway's remedies used at that juncture would cut short many a serious and fattal attack. They act with wonderful efficacy on every organ of secretion, but especially do they regulate the stomach, liver and kidneys, in restoring their healthy functions, and casting out any obstructions or impurities. It is necessary for the ointment to be well rubbed into the small of the back twice daily, when it is absorbed and greatly augments the purifying and salutary influence of the Pills.

HOZLOWAY'S OINTMENT.—Wounds, Scalds, Burns, and Irritating Sores.—The peculiarly mild, soothing, anti-inflammatory power exerted by this Ointment strongly recommends its use to all persons who have charge of children. Accidents will occur in the nursery in spite of the greatest caution and utmost vigilance. The scratch, the burn, or the scald, treated early with this Ointment, assumes no angry aspect, and never long tortues the little sufferer, whose very cry excites each bystander's compassion and pierces the parents heart. Every nurse should consider this invaluable Ointment an essential to a well appointed nursery. The Ointment is applicable to any ore, whatever its character. It conducts to health as sure as the compass points to the north. HOLLOWAY'S CINTMENT AND PILLS-Palpite

HOLLOWAY'S OINTMENT AND PILLS—Pulpitation, Shortness of Breath, Dropsy—This last named disease is often preceded by irregular action of the heart, and difficult respiration which symptoms are always severe, and ever go from bad to worse, unless proper means of cure be resorted to. In Holloway's unrivalled Ointment and Pills' the dropsical patient will ever find succour; the present relief derived from the use of these remedies is marvellously quiek, and perseverance in the steady application of this noble Ointment invariably results in a lasting and satisfactory cure. The two medicines act with such energy on the circulation and absorbent system, that the dropsical fluid vanishes, and the sufferer finds all the oppressive symptoms daily decline, till natural health returns. HOLLOWAY' OINTMENT AND PILLS .- Fistu

HOLLOWAY OINTMENT AND PILLS.—Fistu las, Piles, Excoriations, and Strictures, are speedily relieved and ultimately removed by applying this Ointment after fomentation with warm water. Persons suffering from these securges of the human frame should arrest their progress at once, for it is both insidious and rapid. Fistulas, if long allowed to go on unchecked, not only weaken the nervous system, but destroy life. The sooner these inestimable remedies are used the more certain is success; yet none should despair, hopeless cases have often yielded, and the surferer has been saved a painful death. In excoriations, a few applications of this healing Ointment effect a cure, while the Pills, conjointly used, are especially beneficial in relaxing and removing strictures, whatever their situation or duration. HOLLOWAY'S OINTMENT AND PILLS, a certain

remedy for diseases of the skin-Ringworm scurvy, scrofula, or king's evil, sore heads, an scury, scrofula, or king's evil, sore heads, and the most invoterate skin diseases to which the human race is subject, cannot be treated with a More safe and speedy remedy than Holloway's Ointment and Pills, which act so peculiarly on the constitution, and so purify the blood that those diseases are cradicated from the system, and a lasting cure is obtained. They are equally efficacious in the cure of tumours, burns, scalds, glaudular swellings, ulcerous wounds, rheumatism, contracted and stiffjoints. These medicines operate mildly and surely. The cure effected by them is not temporary or apparent only, but complete and permanent.

Holloway's Pills and Ointment.—Influenza, Colds.—In diseases of the throat and chest Holloway's Pills and Ointment.—Influenza, Colds.—In discase of the throat and chest, sprevalent in this country, nothing so speedily relieves or so certainly cures as these inestimable remedies. These disorders are too often neglected at the commencement; or are injudiciously treated, resulting in either case, in disastrous consequences. Whateverthe condition of the patient, Holloway's medicines will restore, if recovery be possible; they will retard the alarming symptoms till the blood is purified and Nature consuntates the cure, gradually restoring strength and vital nervous power. By persevering in the use of Holloway's preparations, tone is conferred on the stomach and frame generally; the fluids are regenerated, morbide matter is expelled, and a happy revolution occurs throughout the system.

HOLLOWAY'S OINTMENT AND PILLS-Thes HOLOWAY'S OINTMENT AND PILLS—These potent remedies ensittute a materia medica in themselves, for there is no i ternal or external disorder cont. oilable by medicine for which the one or the other of them is not a positive remedy—cruptions, tumrs, seroila, seurry, cancer, asthma, rheumatism, gout, and dropsy entirely subside and disappear under the action of these joint medicines; and in cases of indigestion, sick headache, bile, liver complaints, debility, and other disorders originating in the internal organs, the Pills produce the most astouishing results implications. The student of Nature knows how simple are her ways; if one preparation can throw out all the impurities of the blood, disease is conquered and art is triumphant, because it adopted the simplicity of Nature. Holloway's Ointment and Pills-Acute

Rheumatism. In all severe pains in the joints and muscles, after due fomentation with hot water, the soothing action of this Ointment is most remarkable; it seems at once to lessen inflammation, markable; it seems at once to lessen inflammation, ease pain, reduce the swelling, restore the frecirculation, and expet the disease. In these cuin plaints, indeed, Holloway's Ointment and Pilis are an infallible specific. The Ointment should be rubbed as near the part in pain as the patient can bear; it is absorbed and directly conveyed to the diseased textures, when, acting on nerves vessels, and guiders, it will arrest disease and again establish healthy action. The aperient and purifying qualities of the Pills have the happies, effect in assisting the Ointment.

Holloways Pills.—General debility, low spirits, and nervous irritation, are the consequences of dyspepsia or indigestion. The Pills soon give tone to the stomech, renovate the digestive powers, purify the blood, and give strength to the whole system. Sluggishness of the body and depression of the mind are succeeded by a cheerful activity of the physical and mental functions. Indigestion is the parent of so many evils, and is so common, so universal a complaint, that is a great blessing that such a remedy as this invaluable medicine should have been discovered. No one need long suffer from indigestion with those Pills at nand.
